

## Addax Okwori Phase III

The Okwori Field Development Phase III is based around a converted FPSO, the Sendje Berg, spread moored in approximately 140m of water in sector OPL 90 offshore Nigeria.

Subsea7 have been contracted to supply five off 6 inch production risers and associated flowlines, along with five off 1 ¼ inch bore gas lift integrated umbilicals, arranged in a free hanging catenary configuration

flexlife are assisting Subsea7 in the Delivery Management of this project in terms of :

- Review of flexible pipe design and manufacturing documentation
- Technical support to Subsea7 for all aspects of the flexible pipe supply contract
- Dynamic analysis of flexible riser and dynamic umbilical system to ensure the system design with the additional scope is compliant with the COMPANY requirements
